

TABLE OF CONTENTS

Preface.....	2	Adding Constraints.....	17
Notes for pre 2011 users.....	3	Creating 3D Families	19
Table of Contents.....	5	The Drawing Area and Tools	19
Introduction to Revit Family.....	7	Using Solid Extrusion.....	19
Understanding Revit Families and Types.....	7	Creating Table Base	19
Where We Can Save The Family Definitions?	8	Creating Table Top.....	20
System Families	8	Using Reference Plane and Void Forms.....	21
Component Families.....	8	Creating Table Bottom.....	21
In-Place Families	8	Creating Table Top.....	25
Creating Component Families	9	Adding Parameters	25
Accessing Family Templates	9	Controlling the Family Size.....	25
Modifying Component Families	10	Adding Details to Revit Families	29
Getting Started: 2D Profiles.....	11	Creating the Door.....	29
Creating New Family	11	Adding Extrusion	31
Sketching the Profile.....	11	2D Drawing Components	31
Using the Profile	12	Recreating the Elevation Swing	31
Introduction to Family Types	14	Creating Plan Swing.....	32
Using Parameters.....	14	Controlling Objects Visibility	33
Creating your Own Parameters.....	15	Bonus Challenge	34
Applying Parameter	16	Using 2D Drawings as 3D Revit Family	35
Flexing the Model.....	16	Importing AutoCAD Drawing.....	35
		More Revit Families Exercises	37
		Creating Railing Definitions	37

Elements Involved37

Defining the Railing.....39

Annotation Families42

Adding Labels42

Saving and Copying Families from Another Project.....43
